AeroDawg*™

VETERINARY

LIGHT WEIGHT, METRED DOSE INHALER (MDI) COUPLING CHAMBER FOR DOGS.

Chronic bronchitis is one of the most common respiratory diseases in dogs, but is difficult to diagnose as it can mimic other pathologies. Dogs which experience chronic inflammation are often sensitive to environmental and household allergens.

Chronic bronchitis in dogs is caused by inflammation of the airways, resulting in chronic cough and exercise intolerance. Common signs of chronic bronchitis include;

- **Daily coughing.**
- **Gagging or swallowing after coughing.**
- **Difficulty breathing.**
- **Wheezing for a duration of 2-3 months or longer.**

Features	Benefits
Target specific lung delivery of medication.	Accurate directing of aerosolised pharmaceuticals to the lungs and small airways.
Controls and alleviates airway inflammation and airway obstruction.	Improved drug safety and efficacy by reducing total therapeutic dose required.
Patented 'Flow-Vu' indicator enables accurate counting of inhalations.	Convenient, portable chamber.
Exhalation valve directs the flow of air away from your dog to prevent irritation.	Simple to use and easy to clean.
Two mask sizes to accommodate all breeds and sizes of dogs.	Reduces the risk of side effects and stresses associated with pills, syrups or injections.
Enables multiple medications to be administered via the one device.	

DIRECTIONS FOR USE/CONTRAINDICATIONS
Able to be used as the coupling device for aerosolised Metered Dose Inhalers (MDI's). By depressing the MDI, aerosolised particles are delivered into the chamber and inhaled. Gently apply the mask to the muzzle and upon inhalation, the 'Flow-Vu' indicator will flutter toward the dog signalling inhalation.

CONSTRUCTION
Unique, durable, anti-static polymer chamber with flexible nostril cup.
