

Ranvet's **POTASSIUM PLUS**

with Magnesium • Zinc • Vitamin E

VITAMINS & MINERALS

POTASSIUM SUPPLEMENT FOR PEAK MUSCLE FUNCTION.

ACTIVE CONSTITUENTS (PER L)

Potassium 147g, Magnesium 32.89g, Zinc 1.7g, Vitamin E 4,289IU, Selenium 2.22mg.

Features

- Supplies highly bio-available potassium.
- Helps maintain optimum body fluid balance.
- Helps counteract the stresses of training and strenuous activity.
- Provides highly concentrated potent antioxidants.
- Provides magnesium and zinc in concentrated form, critical for maintaining strong, well developed bone and cartilage tissue.
- Maximises muscle function for heavy sweaters, endurance and stressed horses.
- Essential for maintenance of tissue fluid balance and nerve and muscle excitability and function.

Benefits

- Reduces dehydration, allowing optimal muscle function in extreme environmental conditions.
- Supplies readily available potassium, critical to efficient muscle function, especially in hot climates, due to large amounts of potassium being lost during intense muscle activity and sweating.
- Replenishes potassium lost through urine excretion in stressed horses. Supplementation is recommended, particularly when horses are 'training off'.
- Includes Vitamin E and selenium, which are potent anti-oxidants critical to maintaining healthy muscle function during hard exercise.
- Able to be used in conjunction with daily electrolyte supplementation of Salkavite and Neutrolene to reduce lactic acidosis.

DIRECTIONS FOR USE/CONTRAINDICATIONS

Administer orally over the tongue or place liquid on dry feed.

IMPORTANT NOTE: Potassium is the primary electrolyte mineral found inside body cells. It functions to maintain the correct amount of fluid within the cell as well as normal electrical activity of the cells. Potassium works in close relation with sodium to keep tissue fluid balances correct for optimum performance. Chronic potassium deficiency may severely limit muscle function and performance as well as lead to dehydration, muscle fatigue and tying up.

DOSAGE RATES

Routine use 30mL daily; Racehorses in training 45mL twice daily.

PACK SIZE(S)

5L; 20L.
