

Electro Paste[®]

For Hard Working & Dehydrated Horses

For Rehydration &
Recovery

Stimulates
Thirst Reflex

Reduces Electrolyte
Loss and Stress of Travel

ACTIVE INGREDIENTS per mL:

Sodium 62.4mg, Chloride 201.6mg, Potassium 81.1mg, Magnesium 24.3mg, Calcium 20.9mg, Vitamin B1 1.7mg, Vitamin B2 1.44mg, Vitamin B6 0.17mg, Vitamin B12 0.68mg, Niacin 5.55mg, Vitamin E 16.83mg, Folic Acid 0.35mg, Zinc 1.34mg

FEATURES & BENEFITS

- Supplies a highly concentrated source of B-Group vitamins for energy replenishment.
- Supplies all critical electrolytes required for optimal performance.
- Maintains body fluid balance.
- Supplies anti-oxidants to reduce tissue damage via the effects of free radicals.
- Rapidly metabolised and absorbed.
- Ideal for travelling horses where rapid, convenient, easily transportable electrolyte replenishment is required.
- Reduces the incidence of dehydration, muscle fatigue, poor performance and delayed recovery after strenuous exercise.
- Allows optimal performance in all extreme environmental conditions.
- Maintains cell integrity during hard work.

DIRECTIONS FOR USE/CONTRAINDICATIONS:

Administer paste orally over the back of the tongue as required after exercise or transportation. Always ensure access to clean, fresh drinking water after dosing. Electro Paste is recommended for use in addition to daily in-feed electrolyte supplementation.

DOSAGE RATES:

30-60mL immediately after exercise, dependant on duration and intensity of exercise (500kg body weight).

Following long distance transportation 30-60mL on arrival.

Ponies (200-300kg body weight) should receive half the recommended dose rate.

APVMA APPROVAL NUMBER: 55861

PACK SIZE(S):
60mL Syringe
