

Fungazol[®]

Topical Anti-Fungal Agent

Topical
Ointment

Anti-Fungal

Sooth Ring Worm and Rain
Scald Skin Conditions

ACTIVE INGREDIENTS (per g)

Econazole Nitrate 10mg

FEATURES & BENEFITS

- Broad spectrum anti-fungal activity against a wide range of yeasts and fungi including *Candidia albicans*, *C. guilliermondi*, *Torulopsis* spp. And the dermatophytes; *Trichophyton rubrum*, *T. mentagrophytes*, *Epidermophyton*, *Malassezia*.
- Topical anti-fungal agent with rapid action onset.
- Treats yeast and mould associated ailments.
- Able to be used for short acting and persistent skin diseases and mixed skin infections, both bacterial and fungal.
- Treats a wide variety of fungal ailments including ring worm (most commonly caused by *Microsporum Gypseum*), girth itch (commonly caused by *Trichophyton Equinum*) and rain scald (commonly caused by *Dermatophilus congolensis*).
- Treats a wide variety of independent ailments such as dermatitis, saddle rash, greasy heel and mycotic skin infections in horses, Camels, Dogs and Cats.

DIRECTIONS FOR USE/CONTRAINDICATIONS:

Clean dirt and or dried discharge from the area of application with a warm antiseptic solution. Apply Ranvet Fungazol liberally into and around the affected area twice daily for a period of 6-8 weeks. Reduce application as the condition clears.

IMPORTANT NOTE: Fungi are particularly susceptible to sunlight and hot, dry, clean environments. Therefore, providing dry, clean litter and stabling is a large factor in prevention of fungal infections.

SAFETY DIRECTIONS:

May irritate the eyes and skin. Wear gloves and wash hands after use.
