

# Neutrolene<sup>®</sup>

**Body Acid Neutraliser & Alkali Replacer For Horses**

Performance  
Horses

Highly Palatable  
Liquid

Aid's in Recovery  
after Hard Work

## ACTIVE INGREDIENTS (per L)

Sodium Citrate Dihydrate 279.3g & Citric Acid 93.3g

## FEATURES & BENEFITS

- Rapidly metabolised and absorbed.
- Neutralises excess lactic acid in the blood and muscle.
- Aids in the treatment and prevention of dehydration, acidosis and myopathy/ 'tying up'.
- Balances blood pH for optimum performance.
- Rapid utilisation and acid neutralisation improves recovery rate following strenuous exercise.
- Restores depleted reserves of the most common bodily alkali, sodium.
- Supplies adequate body alkalines to neutralise acid build-up.
- May be dosed immediately following hard work.
- Able to be used in conjunction with standard daily electrolyte supplementation of Ranvet's Salkavite.

## DIRECTIONS FOR USE/CONTRAINDICATIONS:

Administer orally over the tongue or place liquid on dry feed.

IMPORTANT NOTE: Ideally, daily broad spectrum electrolyte supplementation should be practiced via the addition of Ranvet Salkavite to the ration. Additionally, horses coming into work produce greater amounts of lactic acid for a given workload and as fitness increases, the ability to buffer and cope with acid improves considerably.

## DOSAGE RATES:

AS ROUTINE: 90mL Daily, as two 45mL doses in separate feeds.

AFTER A RACE: an additional 30mL (75mL in total) in the night feed.

**APVMA APPROVAL NUMBER: 37978**

**PACK SIZE(S):**

5L & 20L
